Nosakhare Omokaro

nosa@nosa.dev | github.com/nosabecom

Education

University of Regina Regina, SK
Bachelor of Applied Science, Systems Engineering *Starting Sep. 2026*

Projects

RCCG Cornerstone Church Platform | *Astro, TypeScript, Tailwind CSS, Sanity CMS* 2026 – Present

- Building and maintaining a multi-site pnpm workspace for RCCG Cornerstone Assembly, including the main church site, a women's fellowship and conference site, shared UI packages, and a standalone content studio.
- Developed responsive, accessible experiences for events, ministries, sermon archives, newsletters, contact flows, and annual conferences using reusable Astro components and Tailwind CSS.
- Integrated Sanity CMS with typed GROQ queries, schema validation, automatic issue numbering and slugs, and statically generated newsletter pages scoped across two sites.
- Added automated build and route checks plus a tested event-driven function that sends publishing events to the correct Vercel deployment with retries and status tracking.
